

Rudolph and Sletten begins work on new Placerville Casino

www.california.construction.com

The casino is expected to open in late 2008.

Rudolph and Sletten Inc. reports that it has been named general contractor for the \$200 million Foothill Oaks Casino in Placerville.

Foothill Oaks Casino, a 270,000-sq-ft full service gaming facility located 35 mi east of Sacramento on U.S. Highway 50, will open in late 2008. Rudolph and Sletten's Sacramento regional office in Roseville is overseeing the project.

Cunningham Group Architecture, P.A. of Marina del Rey is the architect on the project.

Foothill Oaks Casino is owned by the Shingle Springs Tribal Gaming Authority and is being developed and managed by Lakes Entertainment Inc. The gaming facility is a three-level braced steel frame structure built on a steep hillside location. It includes an 88,000-sq-ft casino floor with 2,000 slot machines and more than 100 gaming tables.

The casino also has retail space and five full-service restaurants, three casino bars, a childcare facility and an arcade.

In addition, the project includes major infrastructure improvements to the

Rancheria and a 1.2 million-sq-ft, eight-story parking structure with 3,100 parking spaces.

ROEL completes conference center

San Diego-based ROEL Construction Co. Inc. has completed construction of a new conference center at the Rancho Bernardo Inn in San Diego.

Located on Bernardo Oaks Drive, the

The center features a 3,200-sq-ft lawn area one-story 27,439-sq-ft conference center includes a 10,000-sq-ft ballroom, 6,700 sq ft of pre-function space with an indoor/outdoor fireplace, a commercial kitchen, a swimming pool and spa surrounded by cabanas, and a new 3,200-sq-ft lawn area with an adjacent trellis-covered patio.

The architecture of the building complements the look of the existing high-end, Spanish-style resort and features a traditional two-piece clay tile roof, exposed wood rafters, and French doors.

WWCOT designs East L.A. College buildings

WWCOT was selected as the designer for the \$12.8 million Student Services Center

The project will incorporate green elements

and Baum Administrative Center at East Los Angeles College. The buildings will form the new "front door" of the campus, in conjunction with a 1.2-acre plaza.

Strategically located to provide the first impression for visitors entering campus from Avenida Cesar Chavez, the student services and administrative buildings were designed to ease new students into higher education by efficiently consolidating pertinent campus departments into one central space.

Both buildings will utilize green building techniques, including recycling at least 75 percent of the construction waste. The Student Services Center, which was designed to achieve LEED-certification, incorporates shading devices and overhangs, low-flow sensor faucets, recycled and regional materials, and energy generated on-site. Sustainable aspects of the administration building include compact fluorescent lights controlled by occupancy sensors, double-pane glazing to reduce heat gain, waterless urinals and natural ventilation.

Construction is scheduled to start by early 2008 and is scheduled for completion in summer 2008. <<
